

WSS -1 6 0 Reactive Silicone

Product technical specification

WSS-1 6 0 is reactive silicone for the manufacture of leather coatings, with reactive properties, good softening effect and ventilation effect , with additional smooth feel.

- Excellent reactivity
- No solvent
- Soft and breathable effect
- With extra smooth feel

Recommended Applications

Two-component system for polyurethane/acrylic resin/isocyanate and polyester/isocyanate

Recommended amount

As supplied calculated on total formulation: 2 .0-20.0%

Technical data

Appearance:
transparent liquid
Active matter
content: 100%

Process Description

Pre-diluted or directly added to the paint in the form of supply can be pre-diluted with the recommended solvent to facilitate adding and mixing

chemical composition

Organosiloxane
copolymer

package

25KG, plastic bucket
200KG, iron drum

Storage stability

Store in unopened original packaging and use within 12 months from the date of production .
