

WSS-180

Product technical specification

WSS-180 is for producing silicone-modified coating resins , can be reacted with the resin after crosslinking with a permanent property effect. Provides excellent softness, demoulding and breathability , and has a super smooth feel.

- Good reactivity
- No solvent
- Soft and breathable effect
- Super smooth feel
- Anti-graffiti effect

Recommended Applications

Polyurethane/acrylic resin/isocyanate and polyester/isocyanate two-component system

Recommended amount

Based on the supply form to the total formula: 1.0-10.0%

Technical data , chemical composition

Appearance : transparent clear liquid

Active matter content : 100%

Molecular weight: about 3 2 00g/mol

Process Description

Pre-dilution or as supplied form of formula added directly added Available

Packaging and storage stability

- 25 kg , plastic drum
- 200 kg , iron drum

Store in unopened original packaging and use within 12 months from the date of production .
